Education

Green University of Bangladesh

Bachelors in Computer Science and Engineering

Dhaka, Bangladesh

Nov 2019 — Jan 2024

Experience

Trainee Software Developer

The Christian Co - operative Credit Union Ltd.

Nov 2024 — Present

Dhaka, Bangladesh

- Developed desktop-based applications using C#, .NET, and Razor Pages, assisted in narrowing the gap between concepts and production.
- Managed 24/7 network monitoring, incident detection, and troubleshooting in a Network Operations Center (NOC) environment.
- Supported ERP software, performance troubleshooting, system checks, and issue solving to ensure reliable operations.
- Practiced version control with GitHub

Video Editor

Wellessia

Aug 2024 — Nov 2024

Dhaka, Bangladesh

- Optimized editing of 200+ shorts, promotional, and tutorial videos, achieving 25% higher viewer retention.
- Optimized social media video content, increasing engagement by 35%
- Worked with the creative team to enhance visual storytelling.

Projects

Girls Hostel Management System | C#

- Designed and developed a C# management system using object-oriented programming concepts and CRUD operations.
- Implemented a dashboard system for smooth management
- Applied OOP principles (encapsulation, abstraction, and modular design) to maintain clean, scalable, and maintainable code.
- Built full Create, Read, Update, Delete (CRUD) functionality with validation to ensure data reliability and consistency.

Brian Kabbo Sarker Portfolio | C#, Tailwind CSS, Typescript, GitHub

Feb 2026 — Present

- Developed a web application-based portfolio using Razor Pages and C# to integrate modern UI patterns and server-side rendering.
- Made it responsive and interactive using TypeScript and Tailwind CSS.
- GitHub data visualization for collaboration insights.

Research

Numerical Sign language detection and Recognition for human-computer Interaction.

Green University of Bangladesh

Sep 2023 — Nov 2024

Academic Researcher

- Developed a numerical sign language recognition system using YOLOv5 + Sobel edge detection, trained on 2,000+ hand gesture samples, achieving 94% detection accuracy for real-time HCI applications.

Skills

Languages & Frameworks: C#, TypeScript, React, Tailwind CSS, JavaScript, HTML/CSS, Python, MySQL

AI & Machine Learning: OpenAI API, Google Generative AI, Claude Sonnet, Gemini

Tools: Git, GitHub, Google Cloud Platform, VS Code, Visual Studio
